Education

Brooklyn College, City University of New York — Brooklyn, NY
Master of Science, Computer Science – Information Systems — August 2025 – Present

Bahcesehir University — Istanbul, Turkiye
Bachelor of Science, Computer Engineering (Full Scholarship) — October 2021 – June 2025

Experience

Poliviz — New York, NY
Founding Engineer — August 2026 – Present
- Develop and maintain the iOS application in Swift and SwiftUI, integrating Supabase authentication, backend APIs, and interactive financial dashboards.
- Contribute to portfolio analysis algorithms and graph-based modeling of financial signals, stock correlations, and sector dependencies to evaluate portfolio risk and market exposure.

CUNY Tutor Corps — New York, NY
Algebra Tutor — August 2026 – Present
- Tutor high school students in algebra at the International High School at Union Square.

Avalanche Team1 — New York, NY
Collaborator — July 2026 – Present
- Serve on the team organizing developer workshops and community events for the Avalanche ecosystem in New York.

The City College of New York — Remote
Research Contributor, Fluid MPC — September 2025 – February 2026
- Implemented MPC protocol primitives in Rust, including secret sharing, commitments, and communication layers.
- Designed adversarial test scenarios, evaluated protocol robustness under churn, and optimized multi-party computation trade-offs.

H.E.R. DAO Turkiye — Remote
Co-Founder — February 2023 – August 2024
- Launched developer onboarding workshops and educational content for women in Web3, leading a community of 100+ developers.
- Edited technical Web3 articles and partnered with projects to host in-person events.

TUBITAK BILGEM — Gebze, Turkiye
Blockchain Researcher — January 2024 – June 2024
- Tracked global and Turkish research in blockchain and cryptology, working closely with the teams building national projects.
- Supported the Digital Turkish Lira (national CBDC; security and privacy analysis of digital money technologies) and next-generation blockchain-based digital identity management (domestic deployment and proof of concept).

Metis L2 — Remote
Developer Relations — January 2024 – February 2024
- Introduced the Metis ecosystem and its technical foundations to developers interested in building on the network.

BlockchainIST Center — Istanbul, Turkiye
Research Assistant — January 2022 – January 2024
- Researched blockchain adoption and financial systems trends; analyzed security, risk, and regulatory developments.

Solana Foundation — Remote
University Relations Manager — February 2023 – July 2023
- Built and scaled university developer communities globally through workshops and hackathons.
- Delivered a developer workshop to approximately 40 participants at Solana Hacker House Istanbul.

Leadership & Activities

BAU Blockchain Club — Istanbul, Turkiye
President — January 2021 – January 2024
- Led a university blockchain club of 500+ members, onboarding many students into Web3 through workshops and events.
- Led teams at national and international hackathons, winning multiple awards.

Solana Foundation, *OG Ambassador* — February 2023 – August 2023

Projects

- **MANDATE**: Personal AI agent protocol: a cryptographic middleware and settlement layer on Ethereum that lets autonomous agents operate under verifiable zero-knowledge risk mandates. Built with Noir, Solidity (Foundry), and TypeScript.
- **Finwise**: Application improving financial awareness and responsible financial behavior through structured user flows.
- **SolLearn**: Award-winning Solana dApp offering a decentralized, NFT-certified education platform.
